SUMMARY

Motivated Computer Science undergraduate specializing in **AI Systems & Visual Intelligence**, with experience in building data-driven web applications and working with structured data. Strong in analytical thinking, communication, and structured problem-solving. Interested in advisory and consulting-oriented roles that combine business understanding with technical and AI-based insights.

EDUCATION

KL University — Bachelor of Technology in Computer Science and Engineering

Specialization: AI Systems & Visual Intelligence

2023 – 2027

GPA: 8.78 / 10

Bhashyam Junior College — Intermediate (MPC)

2021 – 2023

Score: 79%

CORE COMPETENCIES

Analytical Thinking, Problem Solving, Data Interpretation, Process Understanding, Presentation Skills, Communication, Team Collaboration

TECHNICAL SKILLS

Languages: C, Java, Python, SQL

Web: HTML, CSS, JavaScript, React

Backend: Spring Boot, Node.js, Express.js

Databases: MySQL, PostgreSQL

AI / Data (Basics): NumPy, Pandas, OpenCV, Machine Learning Fundamentals

Tools: Git, GitHub, Postman, MS Excel (Basics), PowerPoint

EXPERIENCE

Industry Exposure Visit – Infosys Office, Gachibowli / Microsoft Campus, Hyderabad

2024

- Participated in an industry exposure program at one of the major corporate offices located in the prime IT hub near Gachibowli, Hyderabad.
- Gained insights into enterprise-level software development, project workflows, and corporate operations.
- Observed real-world implementation of large-scale IT systems and agile development practices.
- Interacted with industry professionals to understand career paths, consulting roles, and AI-driven solutions in business environments.
- Learned about organizational structure, client management, and cross-functional team collaboration.
- Enhanced understanding of corporate culture, professional communication, and workplace expectations.

PROJECTS

Budget Planner Web Application

- Developed a full-stack financial management system using ReactJS, Spring Boot, and MySQL.
- Designed REST APIs for managing income, expenses, and categories.
- Implemented JWT-based authentication for secure access.
- Created visual dashboards to analyze monthly spending patterns and savings behavior.
- Improved user decision-making by presenting structured financial insights.

Expense Tracker System

- Built a web-based expense management platform using ReactJS and Spring Boot.
- Enabled CRUD operations for expense and category management through REST APIs.
- Generated monthly reports and visual summaries for better financial tracking.
- Focused on usability and data accuracy for real-world use cases.
